

Cooper Lighting Launches Comprehensive 600-page Catalogue

Cooper Lighting has launched the latest version of its renowned Lighting Solutions catalogue, which provides comprehensive technical information on the company's entire range of lighting products.

Now running to over 600 A4 pages, the new catalogue is divided into colour-coded sections covering recessed fluorescent luminaires, surface fluorescent luminaires, decorative wall and ceiling luminaires, downlights and spotlights, display lighting, emergency lighting, industrial and hazardous-area lighting, exterior lighting, central battery systems, and lighting controls.

The catalogue is designed to be easy to navigate and includes a handy contents section featuring thumbnail photographs of every product to aid the selection process. For anyone already familiar with a product name or part number, there is also an A-Z index to guide them quickly to the page they require.

Each product is illustrated by a colour photograph, accompanied by a short description, a list of key features, detailed technical specifications, dimensions, photometric data, installation guidelines and ordering information.

Also included in the catalogue is a useful technical section containing details of current regulations and standards, as well as design guides and lamp data.

The Lighting Solutions catalogue can be obtained by e-mailing a request to info@cooper-ls.com, clicking on the Literature Request button at www.cooper-ls.com, or calling the Cooper Lighting literature hotline on 01302 303200.
